The DAC Dispatch

Welcome to The DAC Dispatch, the monthly newsletter from the DAC Coalition, keeping you up-to-date with the evolution of all things DAC.

August 2023

THE DAC HUBS/GLOBAL DAC CONFERENCE EDITION

August marks a historic month for direct air capture industry with the landmark announcement by the US Department of Energy of \$1.2Bn in funding to DAC companies and partners through the DAC Hubs initiative. In another first, the U.S Department of Energy announced their intentions to pay for CO2 removal in one of the first examples of national level CO2 procurement.

This month also saw the Direct Air Capture Coalition along with its partners
Breakthrough Energy, RMI and Columbia's Carbontech Development Initiative
launched the Global Direct Air Capture Conference taking place on October 16-17th
in New York City - we hope to see you all there!

Market Updates

Updates from United States Department of Energy (DOE)

1) The DAC Hubs program revealed its winning applications with two regional hubs being announced in Texas and Louisiana named South Texas DAC Hub and Project Cypress, respectively. These commercial-scale facilities will be capable of capturing up to 1 million tonnes per year at each facility.

Project Cypress is consists of DAC developers (and DAC Coalition Founding Members) Climeworks and Heirloom, Battelle as the Hub owner, and Gulf

Coast Sequestration as the geologic sequestration partner. 1PointFive and Carbon Engineering lead the South Texas DAC Hub with CarbonDirect advising on life cycle analysis and community engagement, Worley Group as EPC partners and Lawrence Livermore National Laboratory and Texas A&M overseeing workforce development, Justice40 tracking, environmental protection, and local education.

The DAC Hubs program also directed funding towards <u>19 projects</u> that explore options for Hub design and feasibility. Congratulations to those companies that were selected, including DAC Coalition members:

- 1. Aircapture (Southeast DAC (SEDAC) Hub)
- 2. Avnos, Inc. (CalHub)
- 3. Calcite/8 Rivers (Southeast DAC (SEDAC) Hub)
- 4. <u>CarbonCapture Inc.</u> (Southwest Regional Direct Air Capture Hub & Wyoming Regional Direct Air Capture Hub)
- 5. Fervo Energy (Red Rocks DAC Hub)
- 6. Fluor Corporation (Wyoming Regional Direct Air Capture Hub)
- 7. Removr (Ankeron Carbon Management Hub)
- 8. RMI (Ankeron Carbon Management Hub)
- 9. Sustaera (Ankeron Carbon Management Hub)
- **2) Carbon Negative Shot** In other funding opportunities, the DOE has also announced its <u>intentions to fund pilots</u>, including small mineralization projects and a <u>\$100m DAC Commercial Prize</u>, under the Carbon Negative Shot (a program that aims to bring the price of carbon removal down to \$100 per tonne by 2030). The funding opportunity announcement (FOA) will be released towards the end of 2023.
- 3) Government Procurement of CO2 Lastly, DAC Hubs are not the only policy-making history at the DOE as plans have been put in place to roll-out a \$35 million carbon removal federal procurement program in what will essentially be another advanced market commitment, analogous to Frontier. This will be the first time any government has acted as a buyer of CO2 in its attempt to clean-up climate pollution.
- CDR.fyi released its Mid-Year Progress Report outlining trends and analytics covering purchases, deliveries, marketplaces, and price per tonne. DAC makes up 3% of tonnes purchased with prices sitting between \$800-2054 per tonne. Encouragingly, purchases have increased by 437% compared to full-year 2022 with models forecasting that 2023 will end with 6 million tonnes purchased representing a 10X growth on 2022.
- \$ Deep Sky, a Canadian project development venture looking at scaling and

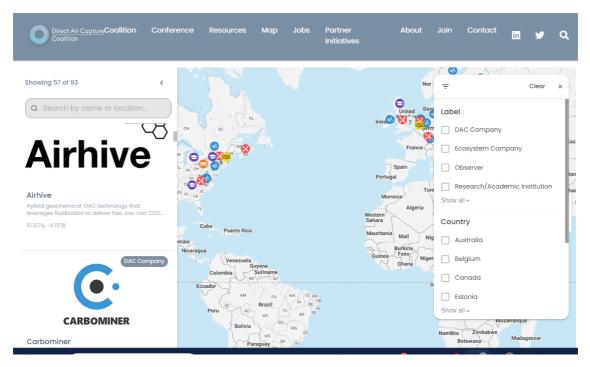

commercializing durable carbon removal solutions, <u>has partnered with XPRIZE</u>

<u>Carbon Removal</u> to offer competing teams the opportunity to pilot at DeepSky's facilities as well as prototyping and licensing deals worth at least \$1 million each. Deep Sky also <u>partnered with Svante</u> this month to test the feasibility of underground CO2 sequestration.

Carbon Engineering has been acquired by Occidental Petroleum for a figure in the region of \$1.1 billion only two weeks after the Canadian DAC company completed one of the largest purchases alongside buyers ANA who bought 30,000 tonnes over the course of three years, starting in 2025.

The DAC Coalition is pleased to launch... The DACC Map

<u>DAC Coalition Map</u>: Helping to bring greater transparency to the diverse DAC ecosystem and the ever-growing number of stakeholders, the interactive map can be filtered by country, name, and type of organisation.

Member Spotlight

Rondo Energy secured a giant \$60m fundraising round led by Rio Tinto, Microsoft's Climate Innovation Fund, Aramco Ventures, SABIC, SCG, and TITAN.

The funds will help Rondo advances the development of low-carbon industrial heat and power products including the trademark

Rondo Heat Battery.

EDAC Labs secured a <u>\$3m Seed round</u> to advance their electrochemical-based DAC with the Grantham Institute for the Protection of the Environment leading the round.

Ukrainian-based DAC company Carbominer, successfully completed the construction of its 1- tonne pilot project in Vienna alongside a prominent corporate partner, taking its technology to TRL6

Carbon Reform, aired a <u>short-form documentary</u> on national television, hosted by actor Dennis

Quaid

The DAC Dispatch (August'23) - DAC Hubs Edition

Cella Mineral Storage's CTO Dr. Claire Nelson and Breakthrough Energy U.S Carbon Management Policy Manager Jack Andreasen were interviewed on the Carbon Curve podcast about carbon storage.

CO2CRC Otway International Test Centre have secured the necessary permits for subsurface injection and are exploring partnerships with DAC companies who need to test their technologies in advance of the XPRIZE final stages.

DACC on the Road

Africa Climate Summit Nairobi, Kenya 4-6th September

We've been working hard behind the scenes to help organize the two durable removals sessions that will take place at the Africa Climate Summit, both of which look to elevate the role Africa can play in creating a carbon removal hub.

If you plan on attending the summit, register below to join us for the Carbon Removal Community Reception on the September 7th!

(It is a private event so note the DAC Coalition in your message)
